

ANIMAL USE STATISTICS RETURN

Please fill out this form and email it to animaethicscommittee@nzase.org.nz as soon as possible after your project finishes.

You are also required to provide evidence about how your project went. This self-monitoring evidence can include:

- A short written description of the project, including how the animals responded
- A series of photos or a short video taken during your project
- A short video of you explaining how your project went
- A photo of your Science Fair board.

Well-researched projects, where photos and/or videos are also submitted, will be eligible for the School's Animal Ethics Committee excellence certificate and a \$100 prize.

| Protected species | |
| Other - please describe: | |

| 4. What happened to the animals after the experiment? | Number |
|--|--------|
| Retained [by your school or you] | |
| Returned [to owner] | |
| Released [to original habitat] | |
| Dead total – if applicable explain the reason for death(s) on the following page | |
| Total | |

ANIMAL USE STATISTICS RETURN

Please describe the results of your research and what you have learnt.

If applicable, please explain the cause of death(s). For future investigations, how you could minimise the risks that caused the death(s)?

Once you have completed the form please email it to animalethicscommittee@nzase.org.nz.
